

Summer Activities

Pairs

You will need a deck of cards.

1. Lay out all of the cards so they are face down.
2. The first player turns over any two cards and shows everyone.
3. If these cards have the same value (example: two Jacks) they put them aside to keep. Then they get to turn over two more cards. If they are not matching cards, turn the cards over and the next person takes a turn.
4. The game is played trying to find as many matching cards as a player can until all the cards have been picked up.
5. Whichever player has the most pairs is the winner.
