

## A Black Cat's Face

I want to draw a black cat's face.

I start with a big, black, round circle for a face.

Then, two long, black, oval eyes come next.

I add two small, black circles placed in each eye.

A round, pink circle is drawn for my cat's nose.

Then, three straight, black lines are added on each side of my cat's nose, these whiskers are placed just so.

Next, one line is drawn for my cat's big smile.

At last, two black, triangles are placed on its head; my cat can now hear with its ears.

**My black cat is now here!**
