

A Sailboat

I want to draw a sailboat to sail across the sea.

I first drew a big, red triangle for the mainsail.

Then, I drew a long, blue rectangle for the boom on the mainsail.

Next, I drew a solid, long yellow rectangle for the mast.

A smaller, green triangle came next for the jib.

I drew a big, blue half circle for the hull.

Then, I drew a small, orange rectangle for the keel of my sailboat.

I added a yellow oval, for the rudder of my sailboat.

Attached to the rudder, I drew an orange rectangle for the tiller in which to steer.

I now have a sailboat that could sail on any sea!
