

Number Order

***Put the numbers all over the room and place them upside down so you cannot see the numbers. (If you are playing outside put the numbers all over the lawn.)**

***One person has to run around turning the numbers over and find 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10. Bring the number back one at a time to a certain area and they have to come back in the correct order or the number gets hidden back into the room.**
