

## Clever Combinations

### Before Playing:

1. Run off 4 pages of the number cards 1-6.
2. Cut the cards apart so you have 60 cards.
3. You will need 2 dice.

### Directions:

1. Mix up the cards and divide them up equally so all cards are used.
2. The first person rolls the two dice. Adds up the dice.
3. The person then makes as many combinations using their cards as what is on the dice.  
Example: The dice are a 4 and a 3. I make combinations that equal 7 with my cards;  
 $3+3+1$ ,  $4+3$ ,  $2+2+2+1$ , etc...
4. The first person to use ALL of their cards is the winner!
