

## How Many Ways Can You Make the Number?

### Before Playing:

1. Run off the number cards 1-10. Gather 10 objects that you can use to count with.

### Directions:

1. Mix up the number cards and then turn one card over. Use the counters to help you make patterns.
2. The person has to make as many patterns using that number as they can. They get a point for each pattern they come up with. (Example: 8 is the number, 4 and 4, 5 and 3, 1 and 7, 2 and 6, so I would get 4 points.)
3. The first person to get 25 points wins!
