

## Train Tracks to 20

### Before Playing:

1. Run off the game board Train Tracks.
2. Gather 20 objects that can be used as game markers (something small will have to be used for this game).

### Games

1. Put game markers on each space starting with 1 and count up to 20.
2. Take off the game markers and count backwards from 20.
3. Take turns placing a game marker on a number and each person has to tell what number you put the game marker on.
4. Put a game marker on any number and count up from that number to 20.
5. Name two numbers and the other person has to count up from \_\_\_ to \_\_\_.
6. Name two numbers and the person has to count backwards from \_\_\_ to \_\_\_.
7. Put two counters on two numbers and the other person has to tell how many tracks they would have to jump to get to the other track. (Example: I put my markers on 6 and 16; it would take ten tracks to get there. I put my markers on 5 and 18; it would take 13 tracks to get there.)
8. Put two counters on two numbers and the other person has to tell how many tracks to get from the largest track to the smallest track. (Example: I put my markers on 16 and 10; it took 6 tracks.)
