

## Check-Up for Addition to 20

\*Put out two collections that don't add up to more than 20. Example: 5 and 7 M&M's collections, your child tells you there are 12 in both collections.

0 My child can add two collections.

\*You will need a number line to 20. Ask your child to add 7 and 9 using the number line.

0 My child can use and understands how to use a number line to add to 20.

\*Run off the sheet, Mixed Addition Facts to 20, and have your child complete it on their own.

0 My child do the sheet, Mixed Addition Facts to 20 with 100% accuracy on their own.
